

The tools form an essential ingredient for any kit that is required by service personnel. The structured cabling system lays stress on following the practices which will add elegance, discipline, method and reliability to cabling. The tools which are used in installation of a cabling system go a long way in determining the above few characteristics. DIGILINK Voice, Impact, Punch Down Tool is designed for seating 5 pairs or 4 pairs of wires of 22-26 AWG into terminal block or cut off end after terminated at a time. These are suitable for both cross connect side and cable side terminal blocks. This tool is provided with a changeable and reversible heel block with blades, so as to use the tool for seating wires only as well as seating and cutting off wires at a time.
